The Recycling Partnership

Harmonized Recycling

Simplifying the system and fostering interlocal collaboration for increased capture

Tuesday, July 15, 2025

**The Recycling
Partnership**
Solving for Circularity

Who We Are

The Recycling Partnership is a team of experts, practitioners, and thought leaders with real-world experience who are delivering on our mission of building a better recycling system.

Our Vision

A future where the burden of waste has been transformed into a beneficial resource.

Our Purpose

Protecting natural resources, building more sustainable communities, and ensuring that everyone who wants to recycle can recycle is at the heart of everything that we do.

Our Mission

Our mission is to build a better recycling system, one that delivers the economic and environmental benefits our communities and the hundreds of thousands of people who work throughout the recycling industry deserve.

Impact to Date ⚡

1 Billion Pounds of NEW Recyclables Captured

1.4 Million Metric Tons GHG Avoidance

*Cumulative Metrics 2015 – November 2024

Together, We're Building a Better Recycling System

Why Are Only 24% of Recyclables Captured in Households?

People support recycling, but they are confused and frustrated by inconsistent instructions

Less than half believe their recyclables are made into new things.

75% of people don't recall receiving communication about their recycling program.

In-home setups are insufficient and lacking point-of-decision supports.

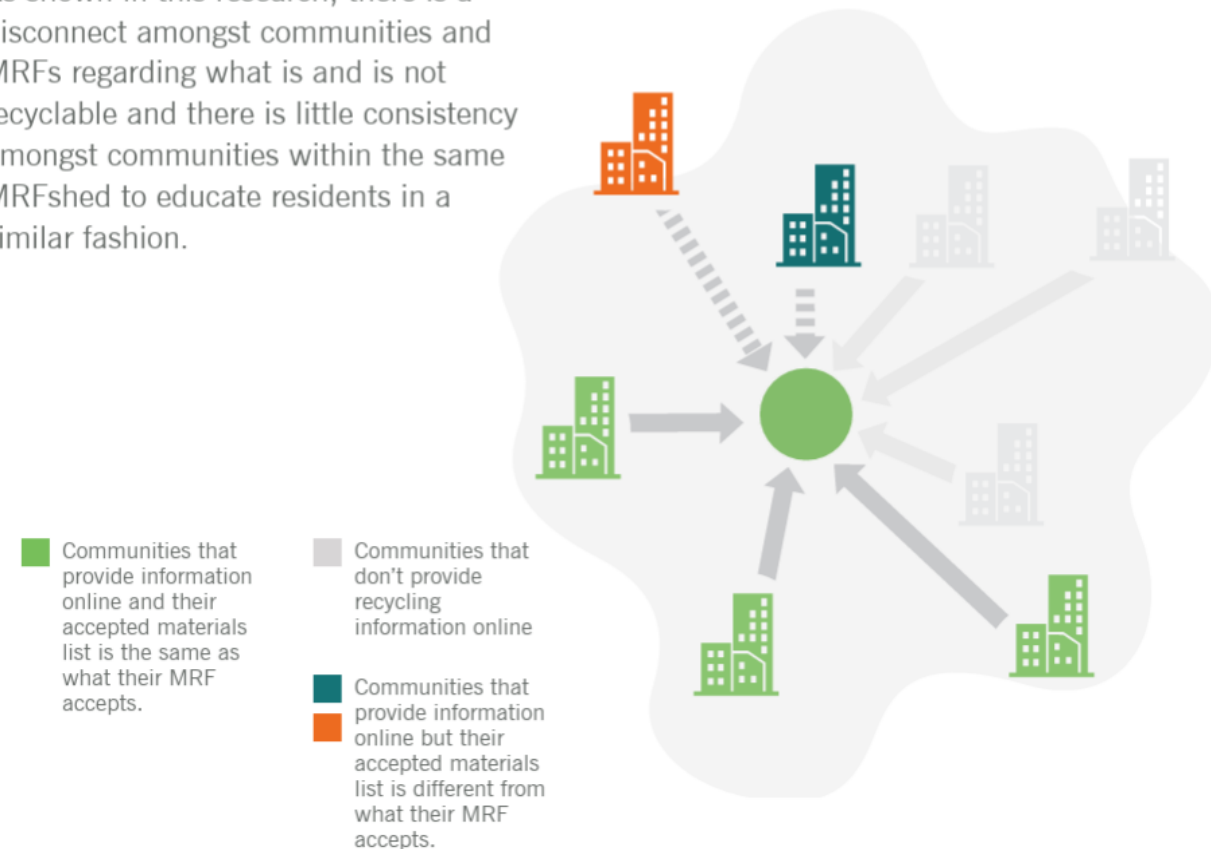

Result: Higher contamination rates
Lower overall capture

What Is Harmonization?

Harmonizing means bringing into consonance or accord.

- **Aligning all stakeholders**—MRFs, municipalities, educators—around **shared messaging**
- Coordinating guidelines so residents see the **same instructions at home, work, and in public**
- Not identical programs, but one unified narrative

As shown in this research, there is a disconnect amongst communities and MRFs regarding what is and is not recyclable and there is little consistency amongst communities within the same MRFshed to educate residents in a similar fashion.

Source: The Recycling Partnership, “MRFshed Report,” August 29, 2017, www.recyclingpartnership.org/mrfshed-report

System-Wide Harmonization: Five Key Elements

- 1 All packaging needs to be designed for recyclability.
- 2 All households need uniform curbside/drop-off access to recycling
- 3 Residents need to fully engage in recycling.
- 4 Recycling facilities need to effectively process the material.
- 5 Recycling facilities need sufficient end markets.

Source: [The Partnership's State of Recycling Report](#)

Communities can achieve harmonization by:

- **Establishing consistent material lists** and terminology by MRFshed
- **Collaborating** to design outreach with consistent colors, imagery and **branding**
- **Regional Outreach Campaigns**
- **Leveraging contracts & regulations**
- **Extended Producer Responsibility (EPR)**

Benefits

- ➔ **Reduces contamination rate**
- ➔ **Boosts curbside participation and material capture**
- ➔ **Builds public trust and reduces program costs**

Case Study

Peoria, AZ

2021 study tested different outreach strategies on 4 collection routes

Before:

Recycling = Brown
Trash = Tan

After:

Recycling = Blue lid +
education flyer

Result:

20.3% lower contamination

Case Study

Fort Collins, CO

New 2024 residential curbside hauling contract requires **standardized cart colors**.

Recycling = blue

Compost = green

Trash = grey

Simplified, regionally consistent recycling guidelines

Statewide Momentum

Source: The Recycling Partnership. [Case Study: Fort Collins, Colorado](#). June 2025.

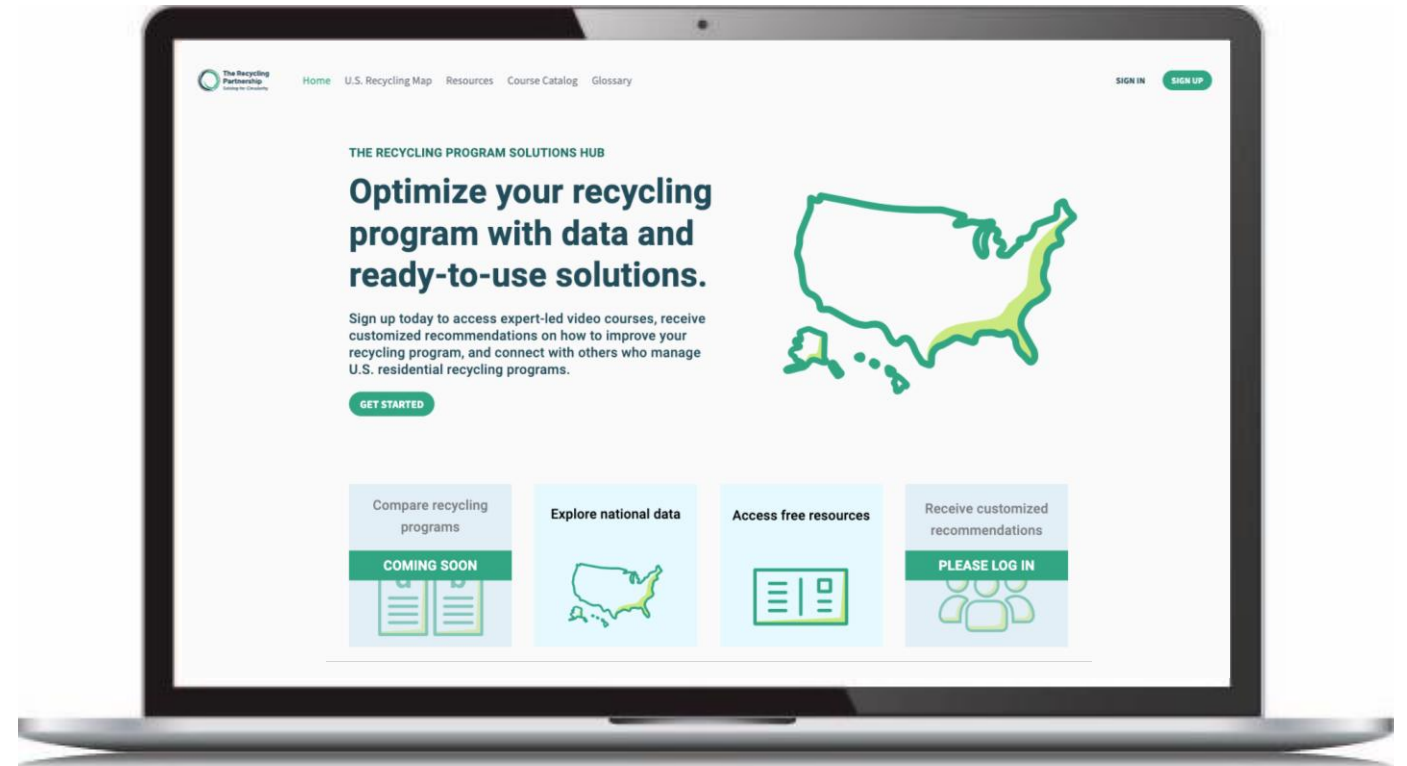

The Recycling Program Solutions Hub

Effective and Innovative Solutions to Increase Material In the Cart

An open-access, free tool for recycling program leaders to **access, track & verify** critical recycling program data.

Focused on **connectivity and actionable suggestions**, the Hub offers a wealth of resources and support for recycling program leaders. It facilitates a **two-way information exchange**, strengthening the system.

Harmonization: Bringing Consistency to Recycling Programs

DO YOU **KNOW** WHAT TO THROW?

Regional Recycling Survey
& Education Campaign

Cassidy Campbell, Program Manager
Environment & Development Department
North Central Texas Council of Governments

This project is funded through a grant from the TCEQ.

What is the North Central Texas Council of Governments?

- Voluntary association of local governments
- Assists local governments in:
 - Planning for common needs
 - Cooperating for mutual benefit
 - Recognizing regional opportunities
 - Resolving regional problems
 - Making joint decisions

North Central Texas Region

16 Counties

169 Cities

53 School and Special Districts

Regional Materials Management Program

- Funded through the Texas Commission on Environmental Quality (TCEQ)
- The Resource Conservation Council directs the funding and provides guidance and support
- Funding covers pass-through grants, regional projects, technical studies, outreach activities, and more

Regional Residential Recycling Challenges

- Low Participation Rates; High Contamination Rates
- Goal: Educate residents how to “recycle **more** and recycle **right**”.
- Solution: Develop a simple and consistent message to amplify across the region so that residents “**know what to throw**”.
- In 2018, the RCC initially allocated ~\$660,000 toward **The Regional Recycling Survey and Education Campaign**

Campaign Development Process

Municipal Survey

Waste Characterization

MRF SURVEY: Acceptable Materials Worksheet

MRF/REP: _____ DATE: _____

CITY/REP: _____

Use this document to identify and address acceptable and problematic materials, inform front line staff, and create materials to educate residents to clean-up the inbound recycling stream. It is recommended that the **local program representative** and **MRF operator/plant manager** complete this worksheet together every 6 months and during the creation or renewal of processing contracts. We encourage this document be used in the RFP process as well.

Mark whether each item is: **Yes: Acceptable** **No: Detrimental** or **No: Non-detrimental** or **No: But recycled**

Non-detrimental items may or may not go to market but do not cause any major problems.
Detrimental items can shut down or damage equipment, harm employees, and/or substantially degrade the value of materials.
But recycled items are not wanted in the stream but will be pulled off the sorting line to be recycled if markets exist.

YES: Acceptable				NO: Detrimental				NO: Non-detrimental				NO: But recycled

Campaign Implementation

Know What To Throw

- Focus on contamination
- Clear and consistent regional messaging
- Promotional activities lead by NCTCOG and amplified by participating entities

Valuable Material Disposed

- Estimated **\$122 million** potentially recyclable material disposed annually
- **Recyclable plastics and metals** represent highest value material with lowest capture rates in region
- Developed Acceptable Materials List for regional consistency and clarity

Harmonization: How a region agreed to recycling and waste disposal messaging and design.

Presented by Jill Aki Hrycyk, Senior Planner
Oregon Metro

What we'll cover

Goals

Process

User testing

Outcomes

Extended producer responsibility

Who we are

Metro is a regional government and planning agency. We work on solid waste, land use, housing, parks and transportation planning as well as key venues like the Oregon Zoo and Oregon Convention Center.

We serve 24 cities in the Portland, Oregon area.

Today we'll talk
trash... and
recycling.

Recycling

Rác Tái chế

回收

Plastic bottles, plastic round containers,
metal, paper & cardboard

21023

 No plastic bags or wrap,
lids, glass, garbage

2030 Regional Waste Plan

Implement regional standards for collection containers, colors, signage and other related information materials for single-family, multifamily and commercial services.

Decal/signage project goal and audience

Create regionally consistent decals and signage for multifamily that meets the needs of all users.

The challenge: inconsistency, contamination and agreeing to one regional design.

Before the project begins, establish the process and trust the experts.

- Multifamily is the most challenging. Lead with it.
- Local government staff know the criteria and the haulers.
- Designers know accessible design.
- Community partners know the experience, firsthand.

Let the community partners select and approve the design.

Primary design criteria

Wayfinding best practices

Create consistency

- Message hierarchy, layout, size of elements

Accessible type

- Strong, familiar typefaces with unique characters, heavier weights and white space

Accessible color

- High contrast, ADA compliant, can't rely on color alone (use photos/icons to compliment color system)

Design criteria

- Local gov't staff determine decal and sign sizes
- Prioritize bin identification and sorting
- Be clear across age, language and culture (prioritize non-verbal cue)
- Be visually distinguishable in the cluttered garbage/recycling areas
- Show individual photos over group photos
- Use four-factor language analysis (Vietnamese, Russian, Spanish and Simplified Chinese)
- Have no logos or contact information

**Most importantly, it
needs to work for the
users.**

Two designs for testing

User testing

User testing process

- Co-created with Trash for Peace and Centro Cultural
- Residents provided feedback via printed surveys and over the phone
- A/B testing to measure decal effectiveness
- All participants indicated decal preferences

User testing participants

Languages

- English
- Spanish
- Vietnamese
- Russian
- Chinese

User testing participants

Type of Participant

Staff

11.0%

EP

27.4%

Resident

61.6%

User testing priorities

- Layout preference (hierarchy, typography)
- Wording and visual comprehension
- Images (show accepted items vs. showing accepted and unaccepted items)
- Garbage decals with and without images of contaminating items commonly found in recycling stream

User testing feedback

Decal effectiveness

- Participants who reviewed **Decal Set B** did better for 4 of 7 items:
 - Takeout containers, coffee cups, yogurt containers and plastic lids
 - No significant difference for coffee filters, milk cartons and glass jars

Which bin does a takeout container go into? (answer: garbage)

Which bin does a plastic lid go into? (answer: garbage)

Decal preferences

Clear Preference for Decal Set B

Decal feedback

“Bright colorful pictures make it easier to understand what goes in each category.”

“The different colors are helpful to distinguish the categories.”

“The images for what not to throw away are helpful.”

“Me gusta el B tiene otras fotos que nos indica que esos articulos no se ponen en ese contenedor.”

Decal feedback from Environmental Promoters

“The more images, the better! Definitely having images for each section, including what should NOT go in the containers, is important. Definitely an improvement! ”

“The large images makes it so much easier to know what each image is of. Previous signs had such small images it was hard to tell.”

“El conjunto B esta muy bien explicado con imagenes y letras.”

Final designs and outcomes

Final designs and outcomes

Recycling

Reciclaje Утиль Rác Tái chế 回收

Plastic bottles, plastic round containers, metal, paper & cardboard

❌ No plastic bags or wrap, lids, glass, garbage

Glass

Other items

These things should not go in your garbage or recycling bins.

Large items, including mattresses and furniture; ask your property manager or find donation options: 503-234-3000

TVs, computers, monitors, printers, keyboards, mice & other electronics: oregonmetro.gov/recycle

Hazardous waste: chemicals, propane tanks & flammable items: oregonmetro.gov/landrecycle

Fluorescent light bulbs, batteries & things with batteries in them: oregonmetro.gov/landrecycle

Medications: www.oregonmetro.gov/landrecycle

Not sure about an item? Go to oregonmetro.gov/landrecycle or ask an expert at 503-234-3000.

Recycling

Paper, flattened cardboard, metal, plastic bottles, round containers (6 oz or larger), rigid nursery pots (4" or larger), all empty and dry

❌ No plastic bags or wrap, lids, glass, coffee cups, garbage, to-go containers

Find more information

Visit WashingtonCountyRecycles.com
recycle@WashingtonCountyOR.gov
503-846-3605
@WashingtonCountyRecycles

Glass

Bottles & jars only, empty & dry

❌ No lids, lightbulbs, caps, ceramics, broken glass of any kind

Hazardous waste

Visit OregonMetro.gov/HHW or call 503-234-3000 for proper disposal options.
Includes chemicals, propane tanks and flammable items, medications, motor oil, TVs, computers or other electronics.

Garbage

All garbage, plastic bags, frozen food boxes, packaging with bubble wrap, to-go containers, cups, lids, straws and cutlery (paper, plastic and "compostable")

❌ No TVs, computers, batteries, hazardous waste (flammables, paint, pesticides), syringes or medical sharps

Bulky waste

Consider giving away large household items that are still in good condition or visit WashingtonCountyRecycles.com/GRD for donation locations.

Disposal options:
[Forest Grove Transfer Station](http://ForestGroveTransferStation.com)
1525 B St.
Forest Grove, 97116
800-808-5901
No hazardous waste

[Tualatin Valley Waste Recovery Facility](http://TualatinValleyWasteRecoveryFacility.com)
Located at Hillsboro Landfill
3205 SE Minter Bridge Rd.
Hillsboro, 97123
503-640-9427
No food or hazardous waste

Call before you go for disposal rates, to confirm accepted items and hours.

Extended Producer Responsibility

The next frontier

Moving forward: How do we integrate statewide/national recycling materials with our other waste stream messaging and EPR programs?

Recycling Guide

Thanks for recycling these items! All items must be empty and dry.

Following the guidelines of what is allowed in your recycling bin saves natural resources, reduces pollution and creates jobs.

Scan for: العربية, 简体中文, 繁體中文, हिन्दी, 한국어, Русский, Af-Soomaali, español, Tagalog, українська, tiếng Việt.

Cardboard and Cartons

Flattened cardboard, packaging boxes, food and beverage cartons
Pizza boxes must be empty with no food residue.

Paper

Newspaper, magazines, office paper, egg cartons, mail, paperback books, bags, and non-metallic gift wrap

Plastic

Bottles, round containers, buckets, and rigid plant pots
Caps OK if screwed on.
All items must be 2 inches by 2 inches or larger.

Metal

Metal cans, foil, empty aerosols, scrap metal, and empty paint cans

Glass

Bottles and jars
Remove caps and lids.
Place in glass only bin

No!

No bagged recyclables

No batteries

No food or liquid
(empty all containers)

No plastic bags or stretchy plastics
(store or depot drop-off)

No hoses, cords, or wires

Recycling

Paper, flattened cardboard, metal, plastic bottles, round containers (6 oz or larger), rigid nursery pots (4" or larger), all empty and dry

No plastic bags or wrap, lids, glass, coffee cups, garbage, to-go containers
