## MATERIAL & CONSTRUCTION DETAILS

Not all recycling, waste or PPE receptacles are created equal. Our company policy is never to compromise on our workmanship or the quality material standards we've set. We only recommend and use quality first grade materials on our recycling & waste containers, and source these from OEM's at highly-competitive prices. Being a manufacturer that buys at high-quantities gives significant buying power with companies which in turn saves you money.

The design process, materials used, finishes and manufacturing standards all affect the final product. Every decision is vital to getting the most value for your investment. You deserve recycling & waste containers that meets your demands for quality and durability and will enhance your working environment for years to come.

Component	Material(s)	Construction
Base, Post & Signframe	Powder Coated Steel	Fire-safe steel construction
Signage	100lb. Digital Cover Coated Paper	• 30% PCW FSC®

# INSTALLATION

Busch Systems<sup>®</sup> Happy Hands Sanistand is hassle free when it comes to installation. Each unit comes with all required components, individually boxed using high-density cardboard with high-recycled content to ensure safe and environmentally friendly transport.

To install your Happy Hands Sanistand Unit:

- 1. Slide the Sign Frame Post into the Stand pole and use provided hardware to secure in place.
- 2. Install provided sign into Sign Frame or install the custom signage of your choosing.
- 3. Place 32 oz hand sanitizer bottle into the bottle holder.
- 4. Place the Stand in your desired location.

# CARE & MAINTENANCE

Busch Systems<sup>®</sup> powder coated steel products are finished with a polyester powder coat paint that is intended to help keep your recycling and waste containers protected and attractive looking for as long as possible in their environment. Their appearance and lifespan will be greatly affected by their care. Powder coated finishes can be treated like most other paints and benefit from regular cleaning.

The frequency of cleaning required depends on the environment in which the containers are used. Outdoor containers will be subject to different environmental conditions than indoor units, i.e. sun, rain, wind, pollution, winter temperatures, and salt/sea air.

To avoid the accumulation of dirt and grime on your Busch Systems<sup>®</sup> products, and help prevent corrosion, we recommend that a mild detergent be used (not an abrasive), such as a pH-neutral liquid (hand dishwashing or hand car washing soaps, for example) diluted in warm water. Rinse well with clean water. Any dirt adhering to the powder coating should be removed. In order to remove deposits such as salt or dust, use a soft brush (non-abrasive). If this is not sufficient to remove stubborn soiling, the following products have been tested for use:

- Ajax Cream
- Liquid Gumption
- Flash (in water)
- Ajax Liquid (in water)
- Cutting Compound ('T. Cut')

If solvents are absolutely needed to remove marks, a soft cloth dampened with white spirit may be used.

buschsystems.com

#### THINGS TO AVOID

- Solvents such as acetone, contact cleaners, thinners or Methyl Ethyl Ketone (MEK). These solvents are very damaging to the powder coat and will soften and/or dissolve the surface of the coating, diminishing its shine and durability or removing the finish altogether.
- Cleaning water that contains sulfur, iron oxide, chlorine, fluoride
- Waxes that contain abrasives
- Abrasive cleaning tools or brushes
