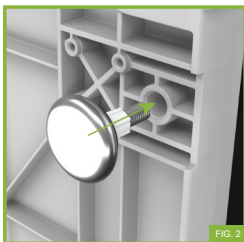

FIG. 2

FIG. 3

### STEP-BY-STEP INSTALLATION INSTRUCTIONS

- 1 Remove the Mosaic station from carton. Locate adjustable feet set from within carton packaging (*Helpful Hint – They are packaged in a small white carton*)
- 2 Flip the Mosaic station on it's side so you can easily access the bottom side of the base (**FIG. 1**)
- 3 Align Adjustable Foot, with Spacer end facing the bottom of the base, to one of the 4 larger holes and press foot into the base of the Mosaic (see above circled holes on **FIG. 1**) until Spacer is all the way in. Continue with this step until all 4 feet have been installed. (**FIG. 2**)
- 4 Adjustable Feet have now been successfully installed. Sit the Mosaic in the upright position, slide in sign inserts, install your bag in liner using the provided bag hooks, place lid on top and move into your desired location. (**FIG. 3**)

**NOTE:** Mosaic feet can be adjusted to desired height by turning the feet counter clockwise.
