#### PRODUCT ACCESSORIES

If you're interested in maximizing the full potential of your Renegade™ Series containers, you can enhance the quality & performance and expand the possibilities with top quality accessories that will add functionality and convenience with ease. These product accessories are designed to help you get the most out of your recycling & waste management equipment. Busch Systems® offers a number of different accessories to add convenience and stability.

To add stability to your Renegade™ Series station, consider the Busch Systems® professional ground mounting kits that allow you to easily secure your station to an ideal location. Add the lid tether or the connector kit for extra security.

For maximum impact, add high-profile Body Signs to your Renegade™ Station to broadcast your organization's messaging and increase stream visibility.

#### 16"W X 26.75" BODY SIGNS\*

\*Choose from stock artwork or customize your own design. \*Hardware included. Requires a Hex Allen Key for assembly.

#### CONNECTOR KIT

#### SET OF 4\*

\*Includes 4 Chicago bolts, 4 Chicago bases, 2 spacers. Requires a Hex Allen Key for assembly.

#### STOCK LABELS & BODY SIGNS

PLEASE NOTE: Because different computers, monitors, and printers render colors and textures differently, actual finishes may vary from those shown here.

#### **IDEAL BAG SIZE**

Renegade™ Series	50 Gallons
Ideal Bag Size (inches)	40 x 58

PLEASE NOTE: The Renegade™ container has bag holders that secures the bag inside the body and eliminates any overhang outside of the bin.

#### MATERIAL & CONSTRUCTION DETAILS

Not all recycling & waste receptacles are created equal. Our company policy is never to compromise on our workmanship or the quality material standards we've set. We only recommend and use quality first grade materials on our recycling & waste containers, and source these from OEM's at highly-competitive prices. Being a manufacturer that buys at high-quantities gives significant buying power with companies which in turn saves you money.

The design process, materials used, finishes and manufacturing standards all affect the final product. Every decision is vital to getting the most value for your investment. You deserve recycling & waste containers that meets your demands for quality and durability and will enhance your working environment for years to come.

Component	Material(s)	Construction
Bodies & Canopy Lids	PCR - HDPE	Bodies are blow-molded from 100% PCR HDPE
Rubber Ballast	Rubber	Molded from 100% Recycled Tire Rubber

#### **ENVIRONMENTAL CONSIDERATIONS**

- All Renegade™ Receptacles use a low energy, resource efficient manufacturing and curing process
- All Renegade™ Receptacle components disassemble at end of life and are fully recyclable
- Low maintenance and extremely long service life
- Manufactured in North America
- <u>Product Carbon Footprint Dashboard for 1 Unit Renegade™ Bin</u>

Busch Systems® is dedicated to environmental responsibility. We maintain an Environmental Management System and are continually working to improve our impact through efficiency, material selection, vendor education, employee involvement, and an unwavering commitment to being a B-Corporation®. If you would like additional information on our product development process or if you don't see the information you need for your project on this page, please contact our Sustainability Team at sustainability@buschsystems.com.

#### California Proposition 65 (Prop 65), REACH (Registration, Evaluation, and Authorization of Chemical Substances – EC1907/2006)

This product series is compliant with both Prop 65 and REACH regulations. We have tested all materials and substances used in production to ensure they don't contain any harmful chemicals listed in these regulations. We prioritize product safety and have implemented strict quality control measures to ensure our products meet or exceed regulatory requirements. Customers can confidently use our product knowing it meets the highest safety standards.

#### LEAD TIME

Our standard lead times on the Renegade™ Series are 1-2 weeks for stock. Please inquire for large and/or custom orders. Please contact us to discuss your specific timing requirements.

#### PRICING AND ORDERING

Please contact us at **800.565.9931** or **sales@buschsystems.com**. At Busch Systems®, we design, manufacture and sell our products directly to you. Our sales team is available to assist you with questions about our products, requests for quotes, and orders. Vertical Managers are located across North America to assist with the front-end specification and quoting process, and our in-house Project Sales Coordinators follow your project through from the time you place an order to shipment.

#### TO ORDER PLEASE SPECIFY

Quantity and component colors. Talk to your dedicated Busch Systems® sales representative for more information. If you do not have a dedicated Sales Representative please contact us via our website at **buschsystems.com/contact-us/** 

#### INSTALLATION

Busch Systems® Renegade™ Series containers are hassle-free when it comes to installation.

To install your Renegade™ Series containers:

- 1. Remove unit from pallet and place in desired location
- 2. (If applicable) Install accessories as purchased.
- 3. (Optional) If installing the Ground Mounting Kit, feed lag bolts through the predrill holes located internally on the bottom of the container.
- 4. Place Rubber Ballast in the bottom of the unit, ensuring that it lays flat.

#### **CARE & MAINTENANCE**

Advantages of Busch Systems® HDPE receptacles include:

- Great low temperature impact resistance and excellent chemical resistance
- Great high temperature impact resistance
- Lower stiffness rating which reduces the potential for stress cracking
- High strength-to-density ratio

Their appearance and lifespan will be greatly affected by their care. The frequency of cleaning required depends on the environment in which the containers are used. Outdoor containers will be subject to different environmental conditions than indoor units, i.e. sun, rain, wind, pollution, winter temperatures, and salt/sea air.

To avoid the accumulation of dirt and grime on your Busch Systems® products, and help prevent corrosion, we recommend that a mild detergent be used (not an abrasive), such as a pH-neutral liquid (hand dishwashing or hand car washing soaps, for example) diluted in warm water. Wipe with a clean wet cloth and towel dry. Any dirt adhering to the powder coating should be removed. In order to remove deposits such as salt or dust, use a soft brush (non-abrasive). If this is not sufficient to remove stubborn soiling, the following products have been tested for use:

- Ajax Cream
- Liquid Gumption
- Flash (in water)
- Ajax Liquid (in water)
- Cutting compound ('T. Cut')

Note: Always test soaps/cleaners on a hidden and/or small area beforehand

If solvents are absolutely needed to remove marks, a soft cloth dampened with white spirit may be used.

#### **GENERAL CARE**

- Clean with a power washer or light scrub brush (outdoor/municipal bins)
- Clean with a mild detergent and damp sponge or cloth (indoor bins)
- For soil and stain remover, cleaners like Fantastik, Armor All or Acetone can be tried
- UV safe cleaners MUST be used on all outdoor bins

#### THINGS TO AVOID

- Cleaners with chloride or bleach
- Strong Solvents
- Abrasive detergents
