Silver (lid)

PRODUCT ACCESSORIES

If you're interested in maximizing the full potential of your Ikona Series containers, you can enhance the performance by adding a sign frame to increase stream visibility.

STOCK GRAPHICS

These stock signs and labels come standard in black, blue, grey and green in the below streams. The Ikona premium labels are lightly textured for durability and ease of application. All labels and signs can be customized to match your unique branding and stream requirements at your request.

MATERIAL & CONSTRUCTION DETAILS

Not all recycling & waste receptacles are created equal. Our company policy is never to compromise on our workmanship or the quality material standards we've set. We only recommend and use quality first grade materials on our recycling & waste containers, and source these from OEM's at highly-competitive prices. Being a manufacturer that buys at high-quantities gives significant buying power with companies which in turn saves you money.

The design process, materials used, finishes and manufacturing standards all affect the final product. Every decision is vital to getting the most value for your investment. You deserve recycling & waste containers that meets your demands for quality and durability and will enhance your working environment for years to come.

| Component | Material(s) | Construction |
|----------------|--|--|
| Body | Powder Coated Steel | • Fire-safe steel construction |
| Lid Frame | Powder Coated Steel | • Fire-safe steel construction |
| Sign Frame | Powder Coated Steel | • Fire-safe steel construction |
| Liners | HDPE | • Made from 10% post-consumer recycled material |
| Levelling Feet | Steel Thread with Plastic Feet | • Plastic bottom reduces scratches and marks on the floor |
| Signage | 100lb. Digital Cover Coated Paper | • 30% PCW FSC® |
| Labels | High Tack Vinyl with Textured Laminate | • Digital printed on premium vinyl with durable overlaminate coating |

ENVIRONMENTAL CONSIDERATIONS

- All Ikona Receptacles use a low energy, resource efficient manufacturing and curing process
- All Ikona receptacle components disassemble at end of life and are fully recyclable
- Low maintenance and extremely long service life
- Manufactured in North America

Busch Systems® is dedicated to environmental responsibility. We maintain an Environmental Management System and are continually working to improve our impact through efficiency, material selection, vendor education, employee involvement, and an unwavering commitment to being a B-Corporation®. If you would like additional information on our product development process or if you don't see the information you need for your project on this page, please contact our Sustainability Team at sustainability@buschsystems.com.

LEAD TIME

Our standard lead times on the Ikona Series are 2-3 weeks for stocked components, and 6-8 weeks for large or custom orders. Please contact us to discuss your specific timing requirements.

PRICING

Please contact us at **800.565.9931** or **sales@buschsystems.com**. At Busch Systems®, we design, manufacture and sell our products directly to you. Our sales team is available to assist you with questions about our products, requests for quotes, and orders. Vertical Managers are located across North America to assist with the front-end specification and quoting process, and our in-house Project Sales Coordinators follow your project through from the time you place an order to shipment.

TO ORDER PLEASE SPECIFY

Quantity, body model, lid model, label choice and any optional product accessories. Talk to your dedicated Busch Systems® sales representative for more information. If you do not have a dedicated Sales Representative please contact us via our website at **buschsystems.com/contact-us/**

INSTALLATION

Busch Systems® Ikona Series containers are hassle-free when it comes to installation. Each container comes fully assembled and individually boxed using high-density cardboard with high-recycled content to ensure safe and environmentally friendly transport.

TO INSTALL YOUR IKONA SERIES CONTAINERS:

1. Unbox each container
2. (Optional) Adjust levelling feet if desired locations floor is uneven
3. Apply your chosen labels and insert signage in the frame inside the door
4. Insert the recycling/waste bag into each liner and wrap the top edge of the bag around the liner

CARE & MAINTENANCE

Busch Systems® powder coated steel products are finished with a polyester powder coat paint that is intended to help keep your recycling and waste containers protected and attractive looking for as long as possible in their environment. Their appearance and lifespan will be greatly affected by their care. Powder coated finishes can be treated like most other paints and benefit from regular cleaning.

The frequency of cleaning required depends on the environment in which the containers are used. Outdoor containers will be subject to different environmental conditions than indoor units, i.e. sun, rain, wind, pollution, winter temperatures, and salt/sea air.

To avoid the accumulation of dirt and grime on your Busch Systems® products, and help prevent corrosion, we recommend that a mild detergent be used (not an abrasive), such as a pH-neutral liquid (hand dishwashing or hand car washing soaps, for example) diluted in warm water. Rinse well with clean water. Any dirt adhering to the powder coating should be removed. In order to remove deposits such as salt or dust, use a soft brush (non-abrasive). If this is not sufficient to remove stubborn soiling, the following products have been tested for use:

- Ajax Cream
- Liquid Gumption
- Flash (in water)
- Ajax Liquid (in water)
- Cutting Compound ('T. Cut')

If solvents are absolutely needed to remove marks, a soft cloth dampened with white spirit may be used.

THINGS TO AVOID

- Solvents such as acetone, contact cleaners, thinners or Methyl Ethyl Ketone (MEK). These solvents are very damaging to the powder coat and will soften and/or dissolve the surface of the coating, diminishing its shine and durability or removing the finish altogether.
- Cleaning water that contains sulfur, iron oxide, chlorine, fluoride
- Waxes that contain abrasives
- Abrasive cleaning tools or brushes
- Contact with electrical current and dissimilar metals
