Spaces Re-Imagined, Safely

The most versatile wipes dispenser on the market. Made from durable, recycled plastic, the GO can function as a desktop dispenser, a wall-mounted unit, or as a wipes and waste station when inserted in the body of the Cleanli™ unit. This instantly-classic container is the ultimate lightweight, durable, and easily adaptable option for flexible dispensing solutions.

PRODUCT ACCESSORIES

If you're interested in maximizing the full potential of your GO Series container, you can enhance the quality & performance and expand the possibilities with top quality accessories that will add functionality and convenience with ease. These product accessories are designed to help you get the most out of your sanitizing equipment. Busch Systems® offers the below accessories to add convenience and visibility.

To add versatility to your GO Series station, consider the Busch Systems® professional quality bracket that allow you to easily mount your GO Series station to a wall or surface for better accessibility and maintenance.

For more customization, all of the GO Series bodies are compatible with the GO Series sign frame and label options that increase visibility.

STOCK LABELS

To clearly indicate the type of sanitizing wipes within the GO Series container, these stock label options are available. All labels are able to be customized.

NOTE: Because different computers, monitors, and printers render colors and textures differently, actual finishes may vary from those shown here.

MATERIAL & CONSTRUCTION DETAILS

Not all recycling, waste or PPE receptacles are created equal. Our company policy is never to compromise on our workmanship or the quality material standards we've set. We only recommend and use quality first grade materials on our containers, and source these from OEM's at highly-competitive prices. Being a manufacturer that buys at high-quantities gives significant buying power with companies which in turn saves you money.

The design process, materials used, finishes and manufacturing standards all affect the final product. Every decision is vital to getting the most value for your investment. You deserve recycling, waste and PPE containers that meet your demands for quality and durability and will enhance your working environment for years to come.

| Component | Material(s) | Construction |
|------------|---------------------|---|
| Body & Lid | HDPE | <ul style="list-style-type: none"> Bodies & Lids are molded from durable HDPE and contain up to 35% recycled content |
| Sign Frame | HDPE | <ul style="list-style-type: none"> GO Sign Frames are molded from durable HDPE and contain up to 35% recycled content |
| Bracket | Powder Coated Steel | <ul style="list-style-type: none"> Fire-safe steel construction |

ENVIRONMENTAL CONSIDERATIONS

- All GO Receptacles use a low energy, resource efficient manufacturing and curing process
- All GO receptacle components disassemble at end of life and are fully recyclable
- Low maintenance and extremely long service life
- Manufactured in North America

Busch Systems® is dedicated to environmental responsibility. We maintain an Environmental Management System and are continually working to improve our impact through efficiency, material selection, vendor education, employee involvement, and an unwavering commitment to being a B-Corporation®. If you would like additional information on our product development process or if you don't see the information you need for your project on this page, please contact our Sustainability Team at sustainability@buschsystems.com.

LEAD TIME

Our standard lead times on the GO Series are 2-3 weeks. Larger orders may require 6-8 weeks to complete. Please contact us to discuss your specific timing requirements.

PRICING AND ORDERING

Please contact us at **800.565.9931** or sales@buschsystems.com. At Busch Systems®, we design, manufacture and sell our products directly to you. Our sales team is available to assist you with questions about our products, requests for quotes, and orders. Vertical Managers are located across North America to assist with the front-end specification and quoting process, and our in-house Project Sales Coordinators follow your project through from the time you place an order to shipment.

TO ORDER PLEASE SPECIFY

Quantity and component colors. Talk to your dedicated Busch Systems® sales representative for more information. If you do not have a dedicated Sales Representative please contact us via our website at buschsystems.com/contact-us/

INSTALLATION

Busch Systems® GO Series containers are hassle-free when it comes to installation. Each container comes ready for easy set-up and individually boxed using high-density cardboard with high-recycled content to ensure safe and environmentally friendly transport.

To install your GO Series containers:

1. Remove body from box
2. Place wipes in body
3. Thread first wipe through bottom of lid
4. Install lid
5. Place in desired location

CARE & MAINTENANCE

Advantages of Busch Systems® HDPE & LDPE receptacles include:

- Great low temperature impact resistance and excellent chemical resistance
- Great high temperature impact resistance
- Lower stiffness rating which reduces potential for stress cracking
- High strength-to-density ratio

Their appearance and lifespan will be greatly affected by their care. The frequency of cleaning required depends on the environment in which the containers are used. Outdoor containers will be subject to different environmental conditions than indoor units, i.e. sun, rain, wind, pollution, winter temperatures, and salt/sea air.

To avoid the accumulation of dirt and grime on your Busch Systems® products, and help prevent corrosion, we recommend that a mild detergent be used (not an abrasive), such as a pH-neutral liquid (hand dishwashing or hand car washing soaps, for example) diluted in warm water. Rinse well with clean water. If solvents are absolutely needed to remove marks, a soft cloth dampened with white spirit may be used.

GENERAL CARE

- Clean with a power washer or light scrub brush (outdoor/municipal bins)
- Clean with a mild detergent with damp sponge or cloth (indoor/office bins)
- For soil and stain remover, cleaners like Fantastik, Armor All or Acetone may be tried
- UV safe cleaners **MUST** be used on all outdoor bins

THINGS TO AVOID

- Cleaners with chloride or bleach
- Solvents
- Abrasive detergents
- Steel wool or Scouring pads
