## A MESSAGE FROM OUR PRESIDENT & CEO

**When** I founded Busch Systems in 1985, it was because I had a passion for the environment and the exciting developments that were occurring in the recycling industry. Thirty years later, our commitment to the environment and sustainability efforts have become central to our corporate culture. Making the right choices takes inspiration,

education, innovation and participation. We recognize that by constantly striving to reach a higher standard of environmental responsibility, we can encourage our colleagues, suppliers and clients to do the same and look forward to celebrating our successes together.
