DATE: TIME: DIVISION:

RECYCLING & WASTE AUDIT | STATION AUDIT

Use this template to collect data while conducting your Station Audit. Each of your stations have bins for at least one refuse stream, and may be divided into as many as six or more streams! Here you will highlight how full each of those bins are when you are conducting your audit as a percentage. This is valuable information because it shows you which bins are being used more than others, whether your bins are too large or too small, and what types of bins you should be using. Use a fresh template for each division to avoid confusion when entering data. All of this will be factored in to the statistics generated by the resource center.

STATION#	STATION LOCATION	STATION ID	STATION BINS	BIN CAPACITY	FULLNESS	EMPTIED? (Y/N)	NOTES
001	MAIN FLOOR EMPLOYEE ENTRANCE	MFE-001	WASTE	33 GAL	100%		
			CANBOT	33 GAL	50%		
			PAPER	33 GAL	65%		- Plastic bottles in the WASTE stream
			EWASTE	15 GAL	15%
