Ideas for Customizing Your Busch Systems Recycling & Waste Containers

**Innovation is at the heart of what we do, and we are proud
to have partnered with CarbonGraph.**

Working together to make a difference!

Innovation is at the heart of what we do, and we are proud to have partnered with CarbonGraph, an innovative technology, to determine the carbon footprint of our products. Founded in 2021, CarbonGraph's mission is to provide people, companies and governments the environmental context needed to make informed decisions about the sustainability of the goods and services they buy and sell.

In addition to mapping the carbon footprint of our products, the Busch Systems team has been working hand-in-hand with the CarbonGraph team to develop their software and be an example of the steps other companies can take in measuring their environmental impact through data and technology.

Thank you for helping us reduce our carbon footprint

We want to say thank you to Sam, Nicholas, Luke and the entire CarbonGraph team for their efforts that will have a lasting positive effect on our planet for years to come. We also want to extend a big thank you to our suppliers, who have worked with us and provided us with the information required to fully track the lifecycle of our products. And lastly, thank you to the continued efforts of our Operations and R&D teams who will be using this data and, along with their continued efforts to include increased amounts of Post-Consumer Recycled Content in all our containers, will now find more ways to reduce our carbon footprint. This will be an ongoing project for us, and we invite you to follow our journey! We can't wait to share more with you.

**We're committed to doing business for the greater good—that's
why we're proud to be a B Corp™.**

A Certified B Corporation® since 2019, we're one of over 4,000 companies across 74 countries and 150 industries redefining success in business. "We're honored to be a part of the B Corp community," says Craig Busch, President & CEO. "It lets us be bold about who we are and what we believe in—and to make greater impact in the world as a recycling & waste management industry leader." B Corporations voluntarily meet high criteria for social and environmental performance, accountability and transparency. We have committed to using business as a force for good, assessing the work that we do and the way that we do it, and continually implementing processes and practices that consider the impact our business has on all stakeholders – employees, customers, society and the environment.

With a longstanding commitment to making a positive impact, Busch Systems® is one of the largest equipment providers in the waste management industry to achieve B Corp™ certification. Others organizations in the B Corp™ community include Patagonia, Athleta, Allbirds and Veja. "Being a B Corp reminds our employees, our partners and our customers what we stand

for," says Craig. "It lets us put a stake in the ground around our purpose and practices, so we can truly turn business into a movement. We recognize that this is just the beginning and will continue to work hard to better ourselves, our community, and our planet."

WHAT IS A CERTIFIED B CORPORATION™?

Certified B Corporations®, or B Corp™ for short, are for-profit companies that are third-party certified for reaching the highest levels of verified environmental and social responsibility. B Corporations are dedicated to using business as a force for good™.

WHO CERTIFIES B-CORPORATIONS?

The B-Lab is the non-profit behind the B Corp™ brand, which has created this global movement to use business as a force for good. They realized that our social and environmental problems cannot be solved by government and non-profits alone, so they have brought together over 4000 (and counting!) corporations to date to aid in the betterment of our environment and our local & global communities.
