AIRPORTS & PORT AUTHORITIES

Recommended Waste and Recycling Products

Innovative Designs Inspiring Change.

MISSION STATEMENT

To support everyone who cares about waste diversion with leading edge products and services that maximize the quantity and quality of their recycling program.

A MESSAGE FROM CRAIG BUSCH

2025 marks not only a significant point in history for Busch Systems, with 40 years in business, but an important point in history. Having been in this industry over the last 40 years, starting with the earliest days of the recycling movement, I have had the opportunity to see and learn a lot. Anybody can say anything about themselves – what is true? What is real? Who is really making an effort to be impactful? Busch Systems is more committed than ever to supporting sustainable and eco-conscious business choices and being completely transparent - measured and measurable. It's more important than ever to separate ourselves as global leaders in this industry.

We continue to stand by our business values and our products – recertifying our Certified B-Corporation® status with a higher overall B Impact Score than 2019; transparently tracking and measuring the carbon footprint of our product line with CarbonGraph; and ethically supporting the global ocean cleanup

efforts of Plastic Bank, helping to stop over 3.1 million bottles from entering our oceans. As thought leaders, we are invested in sharing our knowledge with others through our Green Thinking Webinar Series, led by our Senior Advisor, Alec Cooley, along with our new Podcast Series: Talkin' Trash with Will Nash.

Over the last 40 years we have made a conscious decision to not only make the best diversion containers, but to be leaders and innovators. While I can't yet share with you all the amazing things to come, I can tell you that it is going to be our most innovative year yet!

On behalf of all of us at Busch Systems®, we wish to thank you for being a part of our family for 40 incredible years!

Craig Busch

Founder, President & Chief Design Officer

We're committed to doing business for the greater good –that's why we're proud to be a B Corp™.

A Certified B Corporation® since 2019, we're one of over 9,000 companies across 105 countries and 160 industries redefining success in business. "We're honored to be a part of the B Corp community," says Craig Busch, President & CEO. "It lets us be bold about who we are and what we believe in—and to make greater impact in the world as a recycling & waste management industry leader." B Corporations voluntarily meet high criteria for social and environmental performance, accountability and transparency. We have committed to using business as a force for good, assessing the work that we do and the way that we do it, and continually implementing processes and practices that consider the impact our business has on all stakeholders – employees, customers, society and the environment.

Working together to make a difference! We are proud to have partnered with CarbonGraph.

Innovation is at the heart of what we do, and we are proud to have partnered with CarbonGraph, an innovative technology, to determine the carbon footprints of our products. Founded in 2021, CarbonGraph's mission is to provide people, companies and governments the environmental context needed to make informed decisions about the sustainability of the goods and services they buy and sell.

In addition to mapping the carbon footprint of our products, the Busch Systems team has been working hand-in-hand with the CarbonGraph team to develop their software and be an example of the steps other companies can take in measuring their environmental impact through data and technology.

To learn more about CarbonGraph, visit: buschsystems.com/carbon-footprint

Plastic Bank empowers the Social Recycling movement that stops ocean plastic and helps alleviate poverty. Busch Systems is improving lives in ethical collection communities in collaboration with Plastic Bank and, in 2024, Busch Systems will help stop the equivalent of 3.1 million plastic bottles from entering the ocean in collaboration with Plastic Bank.

In partnership with Plastic Bank, Busch Systems is directly contributing to five of the 17 United Nations Sustainable Development Goals.
(SDGs 1, 8, 12, 14, 17)

With sustainability as a top priority at Busch Systems®, journeying into recycled plastic lumber was an obvious next step in our product development. We have been incorporating recycled materials into the production of our recycling and waste containers for many years with the goal of decreasing the need to source raw materials and reduce our environmental impact. To continue our commitment to sustainability we created the Aspyre Collection™, exceptionally crafted with the best recycled plastic lumber to suit the needs of our customers.
