BUSCH[®]
SYSTEMS

Innovative Designs Inspiring Change.

MISSION STATEMENT

To support everyone who cares about waste diversion with leading edge products and services that maximize the quantity and quality of their recycling program.

A MESSAGE FROM CRAIG BUSCH

Progress has never been accidental. At Busch Systems®, it's something we design for—intentionally, thoughtfully, and with a clear understanding of the impact our choices create. This year, I'm more energized than ever by the role businesses can play in shaping stronger communities, smarter systems, and a more sustainable future.

I've always believed that good design does more than solve problems—it inspires better thinking. Whether we're creating waste diversion solutions, reimagining how products are made, or pushing ourselves to operate more responsibly, our goal is the same: to make it easier for people and organizations to do better. For us, sustainability isn't a claim; it's a commitment backed by transparency, data, and accountability.

That commitment continues to guide our actions. From advancing our Certified B Corporation™ performance, to measuring and sharing the environmental footprint of our products through CarbonGraph, to supporting global plastic recovery initiatives with Plastic Bank, we

remain focused on turning intention into measurable results. Just as importantly, we continue to invest in education and dialogue—sharing insights, challenging norms, and helping move our industry forward through initiatives like our Green Thinking Webinar Series and Talkin' Trash.

Sustainability - environmental, social, and economic - requires a long-term view and the courage to lead differently. As innovators and problem-solvers, we're committed to building solutions that reflect that belief.

This year, there's a lot that I'm excited to share but for now, know that it represents another meaningful step forward. One that's driven by purpose, powered by design, and grounded in impact.

On behalf of everyone at Busch Systems, thank you for being part of what we're building together.

Craig Busch

Founder, President & Chief Design Officer

We're committed to doing business for the greater good —that's why we're proud to be a B Corp™.

A Certified B Corporation™ since 2019, we're one of over 9,000 companies across 105 countries and 160 industries redefining success in business. "We're honored to be a part of the B Corp community," says Craig Busch, President & CEO. "It lets us be bold about who we are and what we believe in—and to make greater impact in the world as a recycling & waste management industry leader." B Corporations meet high standards of social and environmental impact, accountability and transparency. We have committed to using business as a force for good, assessing the work that we do and the way that we do it, and continually implementing processes and practices that consider the impact our business has on all stakeholders – employees, customers, society and the environment.

Working together to make a difference! We are proud to have partnered with CarbonGraph.

Innovation is at the heart of what we do, and we are proud to have partnered with CarbonGraph, an innovative technology, to determine the carbon footprints of our products. Founded in 2021, CarbonGraph's mission is to provide people, companies and governments the environmental context needed to make informed decisions about the sustainability of the goods and services they buy and sell.

In addition to mapping the carbon footprint of our products, the Busch Systems team has been working hand-in-hand with the CarbonGraph team to develop their software and be an example of the steps other companies can take in measuring their environmental impact through data and technology.

To learn more about CarbonGraph, visit: buschsystems.com/carbon-footprint

Plastic Bank powers the Social Recycling movement to stop ocean plastic and reduce poverty. In collaboration with Plastic Bank, Busch Systems supports ethical collection communities and, as of 2026, has helped prevent the equivalent of 6.8 million plastic bottles from entering the ocean.

In partnership with Plastic Bank, Busch Systems is directly contributing to five of the 17 United Nations Sustainable Development Goals. (SDGs 1, 8, 12, 14, 17)

WASTE WATCHER®

For over 15 years the Waste Watcher® Series has been helping thousands of campuses, municipalities, offices, and other organizations achieve their waste diversion goals! Our main goal at Busch Systems is to continually improve our products to better serve the needs of customers. These redesigned Waste Watcher® Series containers incorporate our innovative easy snap-together sign frame and body connectors, making assembly a breeze. No tools, no hassle, and no frustration. It's that easy!

MOSAIC™

The Mosaic is a versatile, modular recycling and waste container system designed for durability and flexibility. It features customizable signage, secure bag retention clips, and an optional lockable caster kit for easy, safe relocation. Expand your capacity by adding more units with the interlocking connector system, and choose from a variety of lid openings and colors to support effective waste diversion. Perfect for public spaces and workplaces, the Mosaic makes collection effortless, efficient, and stylish. Maximize your messaging with our new elevated back sign frame. Placed higher on your Mosaic™ containers, it enhances visibility to help users sort correctly and reduce stream contamination.

Mosaic Junior — a shortened version of the Mosaic designed for kid-friendly spaces. With the same smart features as the original, the Mosaic Junior includes accessible access and engaging, kid-focused signage to support early waste diversion habits.

With sustainability as a top priority at Busch Systems®, journeying into recycled plastic lumber was an obvious next step in our product development. We have been incorporating recycled materials into the production of our recycling and waste containers for many years with the goal of decreasing the need to source raw materials and reduce our environmental impact. To continue our commitment to sustainability we created the Aspyre Collection™, exceptionally crafted with the best recycled plastic lumber to suit the needs of our customers.
