EXCEPTIONALLY CRAFTED

WITH OUR CUSTOMERS IN MIND

With sustainability as a top priority at Busch Systems®, journeying into recycled plastic lumber was an obvious next step in our product development. We have been incorporating recycled materials into the production of our recycling and waste containers for many years with the goal of decreasing the need to source raw materials and reduce our environmental impact. To continue our commitment to sustainability we created the Aspyre Collection™, exceptionally crafted with the best recycled plastic lumber to suit the needs of our customers.

The Vision™, Venture™, Aura™, Catalyst™ and now our newest additions, the Pizza Box Collector™ and the Towel Valet™ are truly the most versatile and durable designs that complement any space perfectly. These large capacity containers offer a variety of customization options and are available in single or multiple stream stations to help your organization achieve their waste diversion goals. Each container was carefully constructed with our customer's needs in mind. Every detail in the design was analyzed and brought to life using strong and reliable materials that help ensure optimal performance and longevity.

EXPLORE THE ENDLESS POSSIBILITIES

OF UPGRADING YOUR RECYCLING AND WASTE PROGRAM TO A SUSTAINABLE AND LONG-LASTING LEVEL WITH THE ASPYRE COLLECTION™.

VISION™ SERIES

From the courtyard to the cafeteria, the Vision™ Series blends seamlessly into any space while making waste diversion easily attainable. Durability and performance were key factors in every detail throughout the construction of this container, making it a reliable choice for any organization.

FEATURES

- Front facing openings with a variety of restrictive options to designate streams
- Flat top design allows for efficient collection of trays and other materials when applicable in an indoor setting
- Front door access and rigid liners allow for easy servicing
- Stainless steel, rust-resistant hinges and heavy-duty screws complete the construction of a container that is built to last
